MONITORING OF THE SOCIO-ECONOMIC STATUS OF FISHER COMMUNITIES ON LAKE VICTORIA, UGANDA

Konstantine Odongkara and Baker Ntambi

Implementation of a Fisheries Management Plan
National Fisheries Resources Research Institute

Jinja, Uganda: August, 2007
LIST OF ACRONYMS

ARV
BMUs  Beach Management Units
CAOs  Chief Administrative Officers
CAS  Catch Assessment Survey
DFOs  District Fisheries Officers
DFR  Department for Fisheries Resources
FGD  Focus Group Discussion
IFMP  Implementation of the Fisheries Management Plan
KIIIs  Key Informant Interviews
LCs  Local Councils
LTTAs  Long-Term Technical Assistants
LVFO  Lake Victoria Fisheries Organization
NAFIRRI  National Fisheries Resources Research Institute
SPSS  Statistical Package for Social Scientists
SSIs  Semi-Structured Interviews
VCT  Voluntary Counseling and Testing
ACKNOWLEDGEMENTS

The authors would like to thank LVFO and the Project Implementation Unit for their input in supporting the survey.

Appreciation goes to the socio-economics team that assisted in data collection, analysis and report writing namely; Bwambale Mbilingi, Godwin Khisa, Michael Kaidhiwa, Agnes Nasuuna, Edward Balaba and John Baptist Lusala.

Thanks also to the District Fisheries Staff, BMUs and the stakeholder groups for their support and time during the data collection process.

EXECUTIVE SUMMARY

Objective

1. The objective of the study was to provide information on the changes in the socio-economic status of fisher communities. The study aimed at contributing to the following selected OVIs of the IFMP log frame: “10% increase in incomes from fish catches by fishing crews by EOP”, “20% women in BMUs reporting increased household income from fishing by EOP”, “50% women and fishing crew in BMUs reporting greater say in fisheries decision making”

2. The study would also contribute to the revision of the Fisheries Management Plan and to the development of the Fisheries Management Decision Support Tool, by identifying positive and negative socio-economic impacts of different policy scenarios.

Methodology

3. The study, which was conducted around the Ugandan part of Lake Victoria, covered a range of beach types, defined by the species principally targeted. These included; NP-O, NP-Mixed, Mixed beaches, Tilapia only, Tilapia mixed and Mukene only.

4. The survey employed three major data collection techniques, namely literature review, quantitative and qualitative survey and Focus Group Discussions with stakeholder groups.

5. Two survey teams worked simultaneously to collect the data and a total of 601 respondents were covered, from 32 beaches distributed in 11 districts, namely; Busia, Bugiri, Mayuge, Jinja, Mukono, Kampala, Wakiso, Mpigi, Masaka, Kalangala, and Rakai.

Main fishery and occupation of stakeholders

6. The main fishery targeted by boat owners and crew was Nile perch tilapia and mukene. Majority of the women (39%) were engaged in both fish processing and trading followed by fish traders (23.5%) and fish processors (16%) as their main occupation.
7. The majority of boat owners (37.1%) were born in other districts bordering the lake. However, majority of the boat crew (33.3%) and women (40.5%) were born in other districts not bordering the lake. The majority (94.5) of the respondents were Ugandans while a few (5.5) were Kenyans or Tanzanians.

Residence and marital status at the beach

8. Most of the stakeholders, 89.6% (boat owners), 87.1% (crew) and 83.8% (women) lived permanently at the beaches where they operated. Of those who moved, the majority, namely (95.9%) boat owners, (93.5%) crew and (81.6%) of the women had moved for work purposes while the others had moved for family reasons.

9. The majority (60.9%) of boat owners were monogamously married Most of the crew members (68.2%) were monogamously married. Majority (58.1%) boat owners and (46.4%) crew members had customarily married. Most of the respondents (75.1%) of the boat owners, (78.3%) of the crew and (82.8%) of the women lived with their spouses in their households.

Level of education of stakeholders

10. Some of the boat owners (7.9%) had no education, (41.1%) had not completed primary education while (24.3%) had not completed secondary education. Similarly, (51.2%) of the crew had incomplete primary education and only (17.2%) of the women had completed primary education.

Income and expenditure

11. The majority of the respondents ranked income from boats and gears, employment and trading and processing as their main sources of household income. These activities were also ranked as the main sources of own incomes. The mean number of income sources for boat owners was 2.2, 1.7 for boat crew and 2.3 for women. It was generally observed that women had more income sources compared to the boat owners and boat crew.

12. The own expenditure item ranked first by all stakeholders was food followed by school fees and medical costs respectively. The majority of the stakeholders preferred to re-invest some of the incomes earned into their businesses.
13. Majority (43.5%) of the women respondents revealed that they made decisions on own and household expenditure alone.

**Boat owners’ activities**

14. The mean number of boats owned by boat owners was 1.95 boats. The majority (51.0%) of the boat owners targeted Nile Perch, followed by tilapia (33.7%) and mukene (14.9%). Most of them (57.9%) went fishing on their boats. The mean number of crew employed by boat owners was 4.52, the actual number depending on the number of boats owned.

15. An average of 4 fishing trips were made weekly. The major factors for the numbers of trips were that boat owners had other businesses to attend to; boat crew were not enough to employ or that it was not worth it financially.

16. Most boat owners (88.6%) reported that their boats stayed at their respective beaches where they worked. Of those that moved, the boats had moved to an average of 1.97 beaches. Majority of the boat owners (95.1%) paid their crew in cash followed by those who paid in shares of the catch (2.7%).

17. On average fisheries contributed about (80%) to the household incomes of boat owners. However, most of them (73.5%) reported a decrease in incomes over the last 5 years. The major factors for the decline were less fish in the lake as well as higher investment costs in fisheries. Boat owners earned Ushs. 32,476 on average per fishing trip.

**Boat crew data**

18. The boat crew had worked for an average of 6.56 years. Several crew members had been involved in different activities before joining fishing, including farming, agricultural labour, trading in food and non-food items among others.

19. In the last one year, the crew worked on 1.9 beaches on average. Most of them targeted tilapia (41.8%), Nile Perch (38.8%) and mukene (18.9%). Their busiest months in a year were 4 on average, but some crew reported that they were busy throughout the year.
20. Majority of them were paid each day that they worked (95.0%). On average fishing contributed (88.49%) to their household incomes.

**Women involvement**

21. On average, women had 2.3 sources of income for a year. The women normally did not move frequently from beach to beach in search for income as most women (88.9%) earned their incomes from their places because migration was not a common tradition amongst women.

22. On average, women spent 4.2 days working in fisheries activities. On average, fishing contributed about (77.63%) of their household incomes. The average daily income of women from fisheries activities was UShs 11,992.32.

**Bank accounts, saving and credit**

23. Most boat owners (66.8%), crew (95%) and the women (81.6%) did not have bank accounts and this could be attributed to ignorance and lack of banking facilities among fishers. Majority of the women who had (42.4%) said the accounts were owned by their husbands or jointly between both their husbands and themselves. The average number of years of ownership of bank accounts by boat owners, crew and women were 4.4, 3.8 and 4.7 respectively.

24. Most of the respondents with bank accounts had them in the main district towns followed by other districts. Availability of banks was very limited within villages near to landing sites and this was one of the reasons for the low saving culture among fisheries stakeholders.

25. Most of the respondents did not belong to savings schemes. Reasons for not belonging to savings schemes included the lack of saving schemes near beaches, no money to save, ignorance of saving, among others.

26. The saving schemes run by local people themselves were the most prevalent among the fishing communities. Among those who belonged to the savings schemes, boat owners had spent an average of 2.7 years; crewmembers 2.3 years while women 2.7 years in the saving schemes.
27. Majority of boat owners (78.7%), crew members (92.3%) and women (82.6%) had not received credit from financial institutions. Of those who did, 52.4% of boat owners, 41.7% of crew, and 48.5% of the women accessed credit from micro-finance institutions. The other credit sources included savings and credit organizations (SACCOS), banks, friends and family.

28. The reasons for accessing credit varied as most of the women (33.3%) it was reportedly to start new businesses while majority of the boat owners (53.7%) and crew (45.5%) accessed credit to invest in fishing. Majority of the boat owners (69%) and crew (58.3%) did not have any difficulties in credit repayment.

**Mobile phones**

29. Majority of boat owners (55.4%) owned mobile phones, while most of the crew (68.2%) and women (76.4%) did not own them. Boat owners had them on average for 3.8 years followed by women (2.8 years) and crew (2.1 years). Boat owners owned phones to keep in touch with their homes (43.9%), followed by supporting their businesses (15.4%). Majority of the crew owned phones to keep in touch with their homes (58.5%), followed by supporting their businesses (15.4%) and because every one had a phone (13.8%). Most of the women owned phones to support their other fish businesses (47.7%), followed by keeping in touch with home (22.7%).

30. With regard to network usage, most of the boat owners (65.2%) and crew (66.2%) used the MTN network while majority of the women (64.4%) used the Celtel. Boat owners spent a weekly average of UShs 10,193 on airtime; crew members spent UShs 7,427 while the women spent UShs 6,815.

**Beach Management Units**

31. Majority of respondents were members of BMUs although only few could distinguish between a BMU assembly member and executive membership. Most of the boat owners (84.2%), crew (76.6%) and women (59.1%) reported being members of BMUs. Most boat owners (84.2%), crew (72.6%) and women (61%) reportedly voted during the elections for the BMU committee within their respective beaches.

32. Majority of the boat owners (80.2%), crew (72.1%) and women (54.5%) reported attending BMU meetings. It was revealed that 76.7% of the boat owners, 65.1% of
crew and 45.0% of the women reported having great say in decision-making processes, mainly through participation in the meetings.

**Health issues**

33. The majority of the stakeholder groups (97.4% of boat owners, 94.9% of crew and 92.7% of the women) had received some information about HIV/AIDS on radio. However, few of the women (34.9%) and boat crew (44.2%) but more boat owners (50.0%) had knowledge about HIV/AIDS.

34. Majority of the boat owners preferred to get knowledge through community trainers (36.7%) followed by ‘barazas’ (30.0%) and radio programs (20.0%). Most of the crew (40.9%) preferred ‘barazas’, followed by community trainers (26.8%) and radio programs (21.3%). The majority of the women (36.1%) preferred community trainers followed by ‘barazas’ (31.3%) and radio programs (16.7%).

35. Most boat owners (68%) reportedly needed more education/information about HIV/AIDS followed by provision of ARVs (20.1%) and Voluntary Counseling and Testing (VCT) (5.2%) while majority of crew members (67.5%) needed more information/education followed by provision of ARVs (19%) and VCT (6.5%). Most women (54.2%) also needed more information and education followed by provision of ARVs (28.6%).

36. Most stakeholders received treatment from private clinics at the beaches, private health centers near beaches and referral hospitals in the main district towns.

37. Most boat owners (78.9%) reported the nearest health facility to be in the beach villages, followed by in the district (20.6%) while most crew (76.1%) reported that the health facilities were located within the villages surrounding the beaches followed by with in the district (23.4%) and the majority of the women (71.4%) reported that health facilities were found within the beach villages followed by within the district (24.7%).

**Conclusion**

38. Progress had been realized in the areas of participation and decision making by the different stakeholder groups, particularly the crew and women. However, there had
been limited improvements in the earnings of the different stakeholder groups as well as access to social services.

Recommendations

39. Efforts towards increasing and improving social services at landing sites should be stepped-up to improve the quality of life, as more of the stakeholders take up permanent residency.

40. There is need for an improved investigation on the contribution of alternative sources of livelihood to fisher communities, as this research does not effectively capture detailed information on other livelihood sources.

41. BMU operations should be strengthened and BMU networks established to improve participation and decision making by the vulnerable groups.

42. Alternative income sources should be explored, through appropriate studies, to relieve the pressure on fish stocks.

43. There is also need to promote saving and credit by improving awareness and providing financial services to fishing communities.

44. HIV/AIDS information and services should be improved for the fishing communities.

45. There is need to continue socio-economic monitoring of the fisheries, to assess the impacts of local, national and regional programmes on the fishing communities.
MONITORING OF THE SOCIO-ECONOMIC STATUS OF THE FISHER COMMUNITIES ON LAKE VICTORIA, UGANDA

1. INTRODUCTION

Socio-economic research and monitoring is critical for effective and sustainable management of Lake Victoria fisheries and has attracted increasing interest over the past decade. In the last couple of years, socio-economic information and data on Lake Victoria has been generated mainly through studies and frame surveys. Such information is used to guide in the sustainable Monitoring, Control and Surveillance (MCS) activities embraced in the broad Fisheries Management Plan (FMP) of the Lake Victoria Fisheries. Socio-economic monitoring enables fisheries managers to know more about the fisheries stakeholders and the complexities of their livelihoods.

Implementation of the Fisheries Management Plan has had significant impacts on the fisheries communities. Whilst many of these may be negative, the long term impacts are expected to be positive in terms of improved incomes to fishers, increased export earnings and increased participation of women and crew in decision making.

Since the level of compliance and participation by fisher communities varies and is not fully understood, a socio-economic monitoring study would hence generate a detailed picture of the current fishery status in the effort to evaluate the work done so far.

Therefore, this study focused on monitoring some of the OVIs, which were identified in the IFMP log frame. These include; % increase in incomes from fish catches by fishing crew by EOP; % increase of women in BMUs reporting increased household income from fishing; % increase of women and crew in BMUs reporting greater say in fisheries management decision making by EOP.

2. STUDY OBJECTIVE

The major objective of the study was to provide information on the socio-economic status of fisher communities. The study aimed at contributing to OVI P4, OVI P5, OVI P6 and OVI P7 of the IFMP log frame; “10% increase in incomes from fish catches by fishing crews by EOP”, “20% women in BMUs reporting increased household income from fishing by EOP”, “50% women and fishing crew in BMUs reporting greater say in fisheries
decision making”, to the revision of the Fisheries Management Plan and to the development of the Fisheries Management Decision Support Tool, by identifying positive and negative socio-economic impacts of different policy scenarios.

2.1 Specific objectives

The specific objectives are as follows:

i) To evaluate the percentage increase in the number of women and crew reporting increased household incomes from fishing.

ii) To assess the percentage increase in the number of women and crew reporting greater say in fisheries management decision-making.

iii) To determine the percentage increase in incomes from fish catches by fishing crew.

iv) To develop recommendations for policy formulation from the study.

The study would also contribute to the purpose level indicators below, as greater compliance should increase productivity, economic value and management of the Lake Victoria fisheries. Status indicators to be monitored focus on the following areas:

i) Education status

ii) Asset ownership

iii) Housing status

iv) Access to food (fish)

v) Access to information

vi) Health status

vii) Financial status

viii) Well-being indicators

ix) Level of involvement in fisheries activities

x) Fisheries management status

3. METHODOLOGY

3.1 Study Coverage and Sampling

The study, which was conducted around the Ugandan part of Lake Victoria, covered a range of beach types, defined by the species principally targeted. Beach types were defined by the
species principally targeted according to CAS reports and these included; NP-O, NP-Mixed, Mixed beaches, Tilapia only, Tilapia mixed, Mukene only. Appendix 1 summarizes the beaches sampled and beach types. The random sampling technique was used to obtain stakeholder groups for interviews including; boat owners, crew, women while purposive sampling was used to select key informants to seek for their expert opinions and views about co-management in the fisheries in Uganda.

3.2 Data collection

The survey employed three major data collection techniques:

i) Literature review on past studies to generate more information on the OVIs studied.

ii) Quantitative and qualitative survey (semi-structured) carried out at beach level with boat owners, boat crew and women as well as BMU executives.

iii) Focus Group Discussions with stakeholder groups, by gender, to evaluate the productivity, economic value and management of the fisheries.

Two survey teams worked simultaneously to collect the data and a total of 601 respondents were covered, from 32 beaches distributed in 11 districts, namely; Busia, Bugiri, Mayuge, Jinja, Mukono, Kampala, Wakiso, Mpigi, Masaka, Kalangala, and Rakai.

3.3 Data analysis

Quantitative data was entered and analyzed using the SPSS statistical package. Output summaries were presented as frequencies and charts and for the numerical data; means, minimums and maximums were computed. Qualitative data was entered in a tabular form and analyzed using the content analysis method.

3.4 Limitations to the study

The study design excluded the male traders and processors who are among the main agents in fishing activities.
4. SURVEY RESULTS AND DISCUSSIONS

4.1 BACKGROUND INFORMATION

This section provides background information on stakeholders including; involvement in fisheries activities, place of birth, biological and social characteristics, level of education and residency status.

iv.1.1 Main Fishery and Occupation of Stakeholders

The main fishery targeted by boat owners and crew was examined. The fishery was categorized in five types and these included; Nile perch (out board engines), Nile perch (Manual), Tilapia, mukene and others as summarized in the Chart 1.

Chart 1: Main fishery of stakeholders

*Source: Survey Data, 2007*

From the chart, the majority of boat owners (31%) targeted Tilapia followed by Nile perch using outboard engines (30%) and Nile perch by paddled boats (24.5%) while (14%) of them targeted mukene. The majority (34.3%) of the crew members targeted Tilapia followed by Nile perch-outboard engines (25.9%) and Nile perch manual (20.4%) while (18.9%) of them targeted mukene.

The main occupation of women stakeholder was also investigated. The data revealed that the majority of the women (39%) were engaged in both fish processing (Chart 2).
Chart 2: Main occupation of women

Source: Survey Data, 2007

The place of birth of stakeholders was investigated. The survey revealed that the majority of boat owners (37.1%) were born in other districts bordering the lake (Table 1). Majority of the boat crew (33.3%) and women (40.5%) were born in other districts not bordering the lake. The data also revealed that the least number of the stakeholders were born in other countries.

### iv.1.2 Place of Birth

The majority of boat owners (99%) were Ugandans while just a few (1%) of them were Kenyans. Among the crew members, Ugandans comprised of 97.5%, where as Kenyans were 2.5% of them. Majority of the women sampled (97.5%) were born in Uganda and only (2.5%) were born in other countries that bordered the lake like Kenya and Tanzania.

### iv.1.3 Reasons for Movement

The reasons for movement of stakeholders to the beach villages where they were operating were studied. The results from the survey showed that majority of boat owners (95.9%), crew members (93.5%) and Women (81.6%) had moved for work purposes while others had moved for family reasons (Chart 3).

*Source: Survey Data, 2007*
iv.1.4 Residence Status at Beach

The survey sought to provide information on the residency status of stakeholders. The data indicates that majority of the stakeholders (89.6%) boat owners, (87.1%) crew and (83.8%) women permanently lived at the beaches where they operated while a few of them temporarily lived at those beaches (Table 2). It was reported that most those who did not stay at the landing sites where they were operating stayed at other landing sites.

iv.1.6 Marital status of stakeholders

The survey sought information on the marital status of stakeholders. The data showed that the majority (60.9%) of boat owners were monogamously married (Table 5). Most of the crew members (68.2%) were monogamously married while 9.0%. The findings also showed that the majority (74.2%) of the women stakeholders were monogamously married.

iv.1.7 Years in marriage

Stakeholder responses were sought about the number of years spent in marriage and the results indicated that on average married boat owners had spent 13.35 years in marriage as
compared to the married crew average of 7.52 years. The women stakeholders had on average spent 11.16 years in marriage as shown in the Table 6 below.

### Table 6: Years in marriage

</tbody>
</table>

*Source: Survey Data, 2007*

The survey results also indicated that majority of the married stakeholders (64.4%) boat owners, (68.4%) crew and (54.3%) women had not been married before their current marriages, while (35.6%) boat owners, (31.6%) crew and (45.7%) women had been married before.

### iv.1.8  Place of marriage

Discussions and interviews showed that majority of the married stakeholders 58.1% (boat owners), and 46.4% (crew) had customarily married. However, a significant number (34.2%) of the crew had done nothing to regularize their marriages as well as the majority of the women (40.8%) (Table 7).

iv.1.9 Residence of spouse

Stakeholders were asked whether their spouses lived with them in the households. The data indicated that most of the stakeholders (75.1%) of the boat owners, (78.3%) of the crew and (82.8%) of the women lived with their spouses in their households while a few did not. Table 8 below summarizes information on where spouses who did not live with their husbands/wives lived. It shows that majority of the boat owners (61.2%) and crew (80.8%) who did not live with their spouses lived in their home villages while the women (56.0%) lived in other places.

iv.1.10 Level of education of stakeholders

The levels of education among stakeholders were examined. The analysis showed that (7.9%) of the boat owners had no education, (41.1%) had not completed primary education while (24.3%) had not completed secondary education. The results further showed that the majority of the crew (51.2%) had incomplete primary education followed by those who had incomplete secondary education (20.4%). The data also revealed that only (17.2%) of the women had completed primary education (Chart 4). From Chart 4, it can be seen that the levels of education among fishing communities are still very low. The socio-economics baseline survey of 2006 showed that the proportion of respondents who had no education was (13.3%) and those who did not complete primary education was (43.0%).
iv.2 INCOME AND EXPENDITURE

The survey sought information on income and expenditure of fisheries stakeholders. The discussions and interviews of the stakeholders set out to identify the main sources of own and household income and expenditure.

iv.2.1 Main sources of household income

The respondents were asked to rank the main sources of their household income. The majority of the respondents ranked income from boats and gears, employment and trading and processing as their main sources of household income, as shown in the table below (Table 9).

Table 9: First main sources of household income

</tr>
</tbody>
</table>
iv.2.2 Main sources of own income

The main sources of own income for stakeholders were investigated. Table 10 below shows that stakeholders ranked income from boats and gears, employment and trading and processing as their main sources of own income.

Table 10: First main sources of own income

iv.2.3 Number of income sources

The number of income sources for stakeholders was examined. The data depicted that the mean number of income sources for boat owners, boat crew and women were 2.22, 1.69 and 2.29 respectively (Table 11). It was observed that women had more income sources compared to the boat owners and boat crew.

iv.3 BOAT OWNERS SECTION ONLY

This section sought to provide information on boat owners on aspects of fishing assets owned, employment of boat crew and incomes to boat owners.

iv.3.1 Sex of boat owners

The data revealed that the proportion of male boat owners was quite high (95.5%) as compared to their female counterparts (Table 18), showing that men have continued to dominate ownership of boats in the fisheries.
Table 18: Sex of boat owners

### iv.3.7 Frequency of change of crew

Data on the frequency of change of crew by boat owners showed that majority of the boat owners changed their crew staff every few months (50%) while few of them changed the crew annually (Table 25).

iv.3.10 Number of beaches for boat operations

The number of beaches where boats for boat owners had moved were examined. The data revealed that the boats had moved to an average of 1.97 beaches and a maximum of ten (10) beaches.

iv.3.11 Payment of crew

According to the survey, majority of the boat owners (95.1%) paid their crew in cash followed by those paid in shares of the catch (2.7%) while a few of them (2.2%) said that crew were paid in cash and fish (Table 30).

**iv.3.12 Contribution of fishing to household income**

The contribution of fishing to household incomes was a parameter investigated. The data showed that on average fish contributed (80%) to the household incomes of most boat owners.

The variations in income changes were also examined and the data revealed that incomes to most of the boat owners had decreased (73.5%) as depicted in the Table 32. The changes in incomes to boat owners were attributed to several reasons, including; less fish in the lake, increased fish prices as well as less investment in the businesses.

Table 32: How income changed over the last year

iv.4 BOAT CREW SECTION ONLY

The section below details information on the crew as a major category of stakeholders involved in the fisheries. Respondents were asked such issues like number of years worked as crew, main target fish species, frequency of change of boats, mode of payment, main income source and contribution of fishing to household income.

iv.4.1 Years worked as boat crew

Table 34 describes the period for which the boat crew had worked. The data revealed that boat crew had worked for an average of 6.56 years.

Table 34: years worked as boat crew

<td><strong>100.0</strong></td>
</tr>
</tbody>
</table>

*Source: Survey Data, 2007*
iv.4.8 Days spent on income-generating activities

The weekly number of days spent on income generating activities was investigated. The mean number of days worked in a week was 4.6 (Table 41). The reasons for working these numbers of days varied between the groups. The boat crew worked the number of days they did because they considered them enough to achieve what they wanted (12.4%), or they simply didn’t want to work more days (12.4%) or because the boats they worked on were supposed to operate for only those number of days (7.9%) and there was not more work available with other boat owners (0.6). Other reasons included the need to rest and/or engage in other income earning activities.

Table 41: Average weekly days spent on income-generating activities

</tr>
</thead>
<tbody>
<tr>
<td>191</td>
<td>1</td>
<td>10</td>
<td>4.6</td>
</tr>
</tbody>
</table>

Source: Survey Data, 2007

iv.4.9 Busiest months in a year

Investigations revealed that boat crew had few busy months in a year and this was attributed to the decrease in the catch of fish and the mean of 4.05 months were reported as busiest months in a year (Table 42). However, some crew reported that they were busy throughout the year.

Table 42: Number of busiest months in a year

</tr>
</thead>
<tbody>
<tr>
<td>189</td>
<td>1</td>
<td>12</td>
<td>4.05</td>
</tr>
</tbody>
</table>

Source: Survey Data, 2007

iv.4.10 Methods of payment

Several modes of payments in which the boat owners paid the crew members were identified during the survey. The majority were paid in cash (92.5%) whereas others were paid under the share system, where the total fish catch was shared amongst themselves after sale (5.0%) (Table 43).
Table 43: Mode of payment of boat crew

<table>
<thead>

iv.4.11 Contribution of fishing to household income

The survey collected views of the crew members about contribution of fishing to their household income. The data shows that on average fishing contributed (88.49%) to the household incomes of most crewmembers (Table 46).
iv.4.12 Average earnings of crew

The incomes to boat crew were examined and the information revealed that some boat crew earned incomes on a daily basis while others were paid weekly. The mean earnings for crew members paid on daily and weekly basis are given in Table 47 below.

Table 47: average income of crew (UShs)

iv.5 WOMEN SECTION ONLY

The survey examined the women as one of a major stakeholder group in fisheries. The income sources, average incomes and percentage contribution of fishing activities of the women were among the parameters examined.

iv.5.1 Household income sources owned and duration

During the survey, it was observed that the women had various sources of income. On average, women had 2.3 sources (Table 48). The data also revealed that women had had their main sources of income for a mean period of 8.2 years (Table 48).
Table 48: Average number of household income sources and duration

<table>
<thead>
<tr>
<th>Variable</th>
<th>N</th>
<th>Minimum</th>
<th>Maximum</th>
<th>Mean</th>
</tr>
</thead>
<tbody>
<tr>

<td>40</td>
<td>8.2</td>
</tr>
<tr>
<td>household income source</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Source: Survey Data, 2007

The location of the income sources for the women was investigated. The survey revealed that the women normally did not move from beach to beach in search for income and that most women (88.9%) earned their income from their places of operation (Table 49). For a woman to move between beaches in search for income was not considered a common tradition amongst women.

Table 49: Location of income source

**iv.6 BANK ACCOUNTS/SAVING**

**iv.6.1 Ownership of bank accounts**

The discussions with stakeholders set out to analyze ownership of bank accounts by the different stakeholder groups. The majority of boat owners (66.8%), crew (95%) and the women (81.6%) did not have bank accounts (Table 53). The data indicates that the majority of the groups had no bank accounts and this could be partly attributed to ignorance among fishers and lack of banking facilities.

Table 53: whether respondents had bank accounts

<table>

</tbody>
</table>
The data for the women stakeholders indicated that majority of them (48.5%) owned the accounts while (42.4%) of them said the accounts were owned by their husbands. However, only (9.1%) of them said that the accounts were owned by both their husbands and the women.

### iv.6.2 Years of account ownership

The duration of ownership of bank accounts was also investigated. The average number of years of ownership of bank accounts by boat owners and crew was 4.36 and 3.75 respectively (Table 54). The average number of years of ownership of bank accounts by women was 4.65. The data revealed that on average the women maintained accounts in banks longer than the boat owner and crew stakeholders.

#### Table 54: Years of account ownership

</tr>
</tbody>
</table>

Source: Survey Data, 2007

### iv.6.3 Location of the Bank

The location of banks was examined and the results indicated that most of the fisheries stakeholders had their accounts in the main district towns, followed by other districts (Table 55). The data revealed that the existence of banks was very limited within villages near to landing sites and this was one of the reasons for the low saving culture among fisheries stakeholders.

#### Table 55: Location of bank
iv.6.4 Belonging to saving schemes

The stakeholder responses were sought on whether they belonged to savings schemes. The data indicated that most of the stakeholders did not belong to savings schemes (Table 56).

Table 56: Belonging to saving schemes

iv.6.8 Type of credit institution

The types of credit institutions from which fisheries stakeholders accessed loans were examined. The data shows that most of the stakeholders accessed credit from micro-finance institutions (52.4%) of boat owners, (41.7%) of crew, and (48.5%) of the women). The other credit institutions used included savings and credit organizations (SACCOS) and banks. However, a significant percentage of boat owners (11.9%) and crew (16.7%) accessed credit from friends and family (Table 61).

iv.6.9 Reasons for Credit

The reasons for accessing credit varied as majority of the women (33.3%) reportedly accessed credit to start new businesses while boat owners (53.7%) and crew (45.5%) accessed credit to invest in fishing (Table 62).

iv.6.10 Difficulties to Credit Repayment

The stakeholders were asked whether they found any difficulties in receiving credit. The results showed that the majority of the boat owners (69%) and crew (58.3%) did not have any difficulties in credit repayment. However, most of the women (65.6%) reported having difficulties in credit repayment (Table 63), due to failure of businesses, delayed repayment of credit sales as well as failure by clients to pay all the credit back (Table 64).

iv.6.11 Alternative uses of Credit

The stakeholder groups were interviewed on alternative uses of credit. The Table 65 summarizes the results from the analysis. Most boat owners (56.3%) used the credit to buy fishing gears and boats. Majority of women (38.6%), however, used them to expand their businesses.

Table 65: Alternative uses of credit

iv.7   MOBILE PHONES

The usage, ownership and expenditure on mobile phones were examined as part of the survey.

iv.7.1   Ownership of mobile phones

With respect to ownership of mobile phones majority of boat owners (55.4%) owned them while most of the crew (68.2%) and women (76.4%) did not own mobile phones by the time of the survey (Table 66).

iv.7.3 Reasons for mobile phone ownership

The reasons for mobile phone ownership were also examined. The data indicates that most boat owners (43.9%) owned phones to keep in touch with their homes followed by supporting their businesses (15.4%) (Table 68). Majority of the crew (58.5%) owned phones to keep in touch with their homes followed by supporting their businesses (15.4%) and because every one had a phone (13.8%). Most of the women (47.7%) owned phones to support their other fish businesses followed by keeping in touch with home (22.7%).

iv.7.5 Expenditure on mobile phones

During the survey, expenditures on phones were examined and the results indicated that boat owners spent a weekly average of Shs 10,193 on airtime, crew members spent UShs 7,427 while the women spent UShs 6,815 weekly (Table 70).

iv.8 BEACH MANAGEMENT UNITS

The study investigated membership of fisheries stakeholders to BMUs, participation in the voting processes, attendance of BMU meetings and decision making.

iv.8.1 Membership to BMUs

The groups reported that majority of them were members of BMUs. However, few could distinguish between a BMU member and executive committee membership, as was revealed during the survey. The data indicates that most of the boat owners (84.2%), crew (76.6%) and women (59.1%) were members of BMUs by the time of the study (Table 71).

### iv.8.2 Participation in the BMU Voting Process

The boat owners (84.2%), crew (72.6%) and women (61%) reportedly voted during the elections for the BMU committee within their respective beaches (Table 72). The analysis revealed that many fisheries stakeholders were still not registered members of BMUs which had constrained fisheries management significantly.

### Table 72: Participation in the BMU voting process

### iv.8.3 Attending BMU meetings

Attendance of BMU meetings by the different stakeholder groups was examined and the reasons for and against BMU meetings were also sought. From the data, a cross section analysis of the results showed that the women did not attend as many BMU meetings as the crew and boat owners. However, the results show that majority of the boat owners (80.2%), crew (72.1%) and women (54.5%) reported attending meetings (Table 73).
Table 73: Attending BMU meetings

iv.8.4 Having great say in decision making

Decision making by fisheries stakeholders was examined and it was observed that 76.7% of the boat owners, 65.1% of crew and 45.0% of the women reported having great say in decision making processes. However, majority of the women (55%) reportedly did not have great say in BMU decision making (Table 76).

Table 76: Whether stakeholders had great say in decision making

Several reasons were highlighted for and against being able to have great say in decision making by the stakeholder groups and these are presented in the Table 77 below. Generally, those who were able to attend the BMU assembly meetings had opportunity to have great say at the meetings.

Table 77: Reasons for having great say in decision making

Those who did not have a great say in the meetings attributed it mostly to the fact that they did not know much about the BMUs (Table 78).

iv.9 HEALTH ISSUES

During the survey, information and knowledge about HIV/AIDS, information channels, assistance needed and information on nearby health centres were sought.

iv.9.1 Information about HIV/AIDS

The majority of the respondents (97.4% of boat owners, 94.9% of crew and 92.7% of the women) had received information about HIV/AIDS while a few had not as reported during the survey (Table 79).

iv.9.2 How information was received

Information on HIV/AIDS was received from various channels and the results indicated that the radio was the most common mechanism through which information was received followed by community trainers and from health centres/Voluntary Counseling and Testing (VCT) (Table 80). From the data, majority of the boat owners (53.4%) received information on HIV/AIDS from radios followed by community trainers (23.3%). Most of the crew (50.3%) received information on HIV/AIDS from radios followed by health centres (21.1%). Majority of the women (56%) received information on HIV/AIDS from radios followed by health centres (19.2%) (Table 80).

iv.9.3 Knowledge on HIV/Aids

The results from the survey indicated that few of the women (34.9%) and boat crew (44.2%) had knowledge about HIV/AIDS while 50.0% of the boat owners had the knowledge (Table 81). The results depict how fisheries stakeholders have been neglected as regards information on the AIDS scourge.

iv.9.4 Delivery channels to receive information

The respondents were asked about how they preferred to receive more information about HIV/AIDS and the results indicated that majority of the boat owners preferred community trainers (36.7%) followed by barazas (30.0%) and radio programs (20.0%) (Table 82). Most of the crew (40.9%) preferred barazas, followed by community trainers (26.8%) and radio programs (21.3%). The majority of the women (36.1%) preferred community trainers followed by barazas (31.3%) and radio programs (16.7%). Other channels through which stakeholders could access more HIV/AIDS information included; clinics, posters and information in newspapers, among others.

iv.9.5 Assistance Needed

Information on assistance needed to address HIV/AIDS was also sought. The results show that most boat owners (68%) needed more education/information about HIV/AIDS followed by provision of ARVs (20.1%) and VCT (5.2%) while majority of crew members (67.5%) needed more information/education followed by provision of ARVs (19%) and Voluntary Counseling and Testing (6.5%). Most women (54.2%) also needed more information and education followed by provision of ARVs (28.6%) (Table 83).

iv.9.6 Receiving Health Treatment

Respondent views were sought on whether they received treatment for any ailment in the last one month by the time of the survey. The data revealed that most boat owners (59%), crew (63.6%) and women (66.3%) had not received treatment (Table 84).

iv.9.7 Distance to Health Facilities

The distance to health facilities was examined and it was observed that most boat owners (78.9%) reported the nearest health facility to be in the beach village followed by in the district (20.6%) while most crew (76.1%) reported that health facilities were located within the villages surrounding the beaches followed by with in the district (23.4%) and the majority of the women (71.4%) reported that health facilities were found within the beach villages followed by within the district (24.7%) (Table 86).

iv.9.8 Nearest Health Facility

The survey set out to examine the nearest health facility that was available to the stakeholders. The data shows that the nearest health facilities available to fisheries stakeholders were private clinics, followed by public health centres and private dispensaries/hospitals (Table 88).

Source: Survey Data, 2007
5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

5.1.1 Main Fishery and occupation of stakeholders

The study re-affirmed that main fisheries targeted by boat owners and crew were still Nile perch, tilapia, and mukene. Majority of the women (39%) were engaged in both fish processing and trading, followed by those in fish trading only (23.5%) and fish processing (16%) as their main occupation.

The majority of boat owners (37.1%) were born in other districts bordering the lake followed by other districts not bordering the lake (24.8%). However, most of the boat crew (33.3%) and women (40.5%) were born in other districts not bordering the lake followed by other districts bordering the lake (i.e 29.9% and 34% respectively). Most were Ugandans while a few were Kenyans and Tanzanians.

5.1.2 Residence status at beach

Most of the respondents 89.6% (boat owners), 87.1% (crew) and 83.8% (women) permanently lived at the beaches where they operated while a few of them temporarily lived at those beaches. The mean numbers of years lived at the beaches were 13.97 for boat owners, 9.01 for crew members and 7.79 for women. For fishers who had moved, the majority had done so for work purposes while only 3.6% (boat owners), 5.3% (crew) and 16.2% (women) had moved for family reasons.

5.1.3 Age and education

The mean ages of respondents were 36.2 years (boat owners), 29.60 years (crew) and 34.49 years (women). The levels of education among fishing communities were still very low, with some (7.9%) of the boat owners having had no education, (41.1%) not completed primary education while (24.3%) had not completed secondary education. Of the crew, (51.2%) had incomplete primary education, followed by those who had incomplete secondary education (20.4%).

5.1.4 Income and expenditure

The majority of the respondents ranked income from boats and gears, employment and trading and processing as their main sources of household income. The main source of own
income were income from boats and gears, employment and trading and processing. The mean numbers of income sources were 2.2, 1.69 and 2.29 for boat owners, for boat crew and for women respectively. Variations were reported in stakeholder incomes over the years, whereby the incomes to most stakeholders had generally decreased over the last year. This was attributed to scarcity of fish, less value for some fish and less work among others.

Respondents ranked food, followed by school fees and medical costs as the main items on which own income was spent. The main items of household expenditure were food followed by school fees and medical costs respectively. Majority of the women respondents revealed that they made decisions on own and household expenditure alone.

5.1.5 Boat owners’ activities

Of all the boat owners interviewed (95.5%) were males and only (4.5%) were females. The mean number of boats owned was 1.0 boat. The majority (57.9%) of them went fishing on their boats while (42.1%) of them did not. The mean number of crew was 4. The majority (72.9%) often used the same crew members. Most of them changed their crew staff every few months while others changed them annually. Majority of the boat owners (95.1%) paid their crew in cash followed by those who paid in shares of the catch (2.7%).

Boat owners made an average of 4 trips a week. The number of trips was determined by such factors like having other businesses to attend to, insufficient boat crew to employ and when it was not worth it financially. Boat owners earned UShs 32,476 on average per fish trip.

5.1.6 Boat crew members

The mean number of years worked by the beat crew 6.56 years. Several crew members were involved in different activities before joining fishing, including: farming, agricultural labour, trading in food and non-food items among others. The majority had not worked on other boats (65.2%).

The weekly average number of days spent on income generating activities was 4.64 days.

Respondents (boat crew) worked the number of days they worked because they were enough to commit themselves to working according to 12.4% where as the others did not want to work for more days (12.9%).
Others worked for the number of days that they worked because the boat that they worked on was supposed to operate for only those number of days (7.9%) and there was not more work available with other boat owners (0.6). The mean number of busy months in a year was 4 but some crew reported that they were busy throughout the year.

The majority of the crew were paid in cash (92.5%) whereas others were paid under the share system. Majority of them were paid each day that they worked (95.0%) with only a small proportion not paid at the same day when they worked. On average fishing contributes most to the household incomes of crew members (88.49%).

5.1.7 Women participation

On average, women had 2.3 sources of income. They spent on average 4.2 days a week working in fisheries activities, but some of the women spent the whole week doing fisheries related activities.

Fisheries was the main source of household income for most of the women (77.63%). They reportedly earned an average daily income of Ushs. 11,992 from fisheries related work.

5.1.8 Bank accounts, saving and credit

The majority of boat owners (66.8%), crew (95%) and the women (81.6%) did not have bank accounts. Of those who had, the average number of years of ownership of the bank accounts by boat owners, crew and women were 4.36, 3.75 and 4.65 respectively. They had their accounts in the main district towns, followed by those who had theirs in other districts. Presence of banks was limited within villages near to landing sites and that was one of the reasons for the low saving culture among fisheries stakeholders.

Most of the stakeholders did not belong to savings schemes either. The reasons for this included the lack of saving schemes near beaches, no money to save and ignorance of saving, among others.

The majority of the respondents had not received credit from financial institutions. Most of those who did accessed credit from micro finance institutions (i.e. 52.4% of boat owners, 41.7% of crew, and 48.5% of the women). Other credit institutions used included savings and credit organizations (SACCOS) and banks.
The reasons for accessing credit varied but majority of the women (33.3%) reportedly accessed credit to start new businesses while the boat owners (53.7%) and crew (45.5%) accessed credit to invest in fishing. Majority of boat owners (69%) and crew (58.3%) did not have any difficulties in credit repayment. However, most of the women (65.6%) reported had difficulties in credit repayment due to failure of businesses.

5.1.9 Mobile phones

Majority of boat owners (55.4%) owned mobile phones while most of the crew (68.2%) and women (76.4%) did not. Most boat owners (43.9%) owned phones to keep in touch with their homes, followed by supporting their businesses (15.4%). Majority of the crew who had (58.5%) owned phones to keep in touch with their homes, followed by supporting their businesses (15.4%) and because every one had a phone (13.8%). Majority of the women (47.7%) owned phones to support their other fish businesses.

With regard to network usage, most of the boat owners (65.2%) and crew (66.2%) used the MTN network while majority of the women (64.4%) used the Celtel network. Boat owners spent a weekly average of UShs 10,193 on airtime, crew members spent UShs 7,427 while the women spent UShs 6,815 weekly.

5.1.10 Beach Management Units

The majority of stakeholders were members of BMUs although only few could distinguish between a BMU member and executive membership. The majority reportedly voted during the elections for the BMU committee within their respective beaches. However, many respondents were still not registered members of BMUs, which has constrained fisheries management significantly.

Majority of the respondents reported attending BMU meetings regularly. Women did not attend as many BMU meetings as the crew and boat owners. Of those who attended, (76.7%) of the boat owners and (65.1%) of crew reported having great say in decision making processes. However, majority of the women (55%) reportedly did not have great say in BMU decision-making.
5.1.11 Health issues

The majority of stakeholder groups had received information about HIV/AIDS while only a few had not. The information was received from various channels although the radio was the most common medium. Few of the women (34.9%) and boat crew (44.2%) had knowledge about HIV/AIDS while more (50.0%) of the boat owners had the knowledge. The majority of the respondents preferred to receive the information through radio programs, community trainers and ‘barazas’. Other channels through which they could access more HIV/AIDS information included clinics, posters and information in newspapers. Most of the respondents needed more education/information about HIV/AIDS, provision of ARVs and VCT.

Most boat owners (59%), crew (63.6%) and women (66.3%) had not received treatment while (41%) of the boat owners, 36.4% of the crew and 33.7% of the women had received treatment in the past one year. The boat owners, crew and women moved an average distance of 4.35 km, 2.95 km and 2.92 km, respectively, to receive treatment.

The nearest health facilities available to the fisheries stakeholders were private clinics followed by public health centres and private dispensaries/hospitals.

5.2 Recommendations

Efforts towards increasing and improving social services at landing sites should be stepped-up. This is in view of the fact that many fishers are becoming permanent resident of the beaches and because most of the services available are inadequate and of low quality.

Co-management in the fisheries should be strengthened, to improve participation and decision making by the vulnerable groups. This should involve strengthening the operations of BMUs and creation of BMU networks at the local, national and/or regional levels.

There is need for more studies on the contribution of alternative sources of livelihood to fisher communities, as this research does not effectively capture detailed information on other livelihood sources necessary to take the pressure off the fish stocks.

There is also need to improve awareness among fishers on saving and financial services available to the fishing communities. The general lack of saving culture among fishers
demonstrates the urgent need to establish and strengthen saving schemes and financial institutions for fishers.

More information is needed on the impact of HIV/AIDS in the fisheries and also about general awareness of the scourge by the fishing communities through community awareness programs and training, participatory research etc.

There is also need to continue monitoring the fisheries, given the dynamic nature of the socio-economic and other aspects of the fisheries. This would improve understanding by fisheries managers and policy makers for better decision making and planning.

Appendix 2: Boat Owners’ Questionnaire

LAKE VICTORIA FISHERIES ORGANIZATION
IMPLEMENTATION OF A FISHERIES MANAGEMENT PLAN

SOCIO-ECONOMIC MONITORING QUESTIONNAIRE FEBRUARY 2007

BOAT OWNERS ONLY

Name of Beach ...........................................  District.................................

Date ...................................................... Enumerator
Initials..............................

Respondent Number .................

Introduction
The Lake Victoria Fisheries Organization is undertaking a survey around the lake to find out more about people’s lives and how they benefit from fishing activities. Could you please spare a few minutes of your time to answer some questions? All responses will be treated with complete confidence and will be used to help the Fisheries Departments plan better for improving people’s lives and improving the fisheries.

Main fishery of respondent
Nile perch (outboard) = 1
Nile perch (manual) = 2
Dagaa = 3
Tilapia = 4

Background information
1. Sex of respondent
   Male = 1
   Female = 2

2. Where were you born?
   Within this village = 1
   Another village nearby = 2
   This location/sub-county/ward = 3
   This district = 4
   Other district bordering lake = 5
   Other district not bordering lake = 6
   Other country = 7

Name of district and
country.................................................................

3. If not born in this village, why did you move here?
For work = 1
Family reasons = 2
Other (please specify) = 3

4. Do you live at this landing site permanently?
   Yes = 1
   No = 2

5. If yes, for how many years have you lived here?
   
6. If no, where do you normally stay?
   Another landing site in same location/sub-county/ward = 1
   Another landing site in same district = 2
   Another landing site in other district = 3
   Not at a fish landing site = 4
   Other = 5

7. What is your age?
   
8. What is your marital status?
   Never married = 1
   Monogamous married = 2
   Polygamous married = 3
   Living together without marriage = 4
   Separated/divorced = 5
   Widowed = 6

9. If married, for how many years?
   
10. If married, have you married before?
    Yes = 1
     No = 2

11. If yes, how many times have you been married?
    
12. If married now, did you
    Get married in a church/mosque = 1
    Have a civil marriage = 2
    Customary marriage = 3
    Did nothing = 4
    Other (please specify) = 5
13. Do your spouse(s)/partner(s) live in this household now?
   Yes  = 1
   No   = 2

14. If no, where does he/she/they live now?
   Another house at the landing site  = 1
   In the nearby village              = 2
   In nearby town                    = 3
   In home village                   = 4
   Other (please specify)            =

15. What level of education did you reach?
   No education                      = 1
   Incomplete primary               = 2
   Complete primary                 = 3
   Incomplete secondary             = 4
   Completed Secondary               = 5
   Higher education                 = 6

Income and expenditure
16. What are the three main sources of income in your household?
   Rank up to three sources.

Other........................................................................................................................................

18. How many sources of income does your household have in total? 

19. How many boats do you own? 

20. Which type of fish do you mainly target?
   - Nile perch = 1
   - Tilapia = 2
   - Dagaa = 3
   - Other = 4

21. Do you go out to fish on your boat?
   - Yes = 1
   - No = 2

22. How many crew members do you employ? 

23. Do you use the same boat crew all the time?
   - Yes = 1
   - No = 2

24. For how many years have your present boat crew worked for you?
   There could be a range of years, or list number of years for each crew member.

........................................................................................................................................

25. If you change your boat crew, how often?
Each month = 1
Every few months = 2
Every year = 3
Other =
4………………………………………………………

26. If you change the boat crew, why?

They leave the landing site = 1
They fish illegally = 2
They are dishonest = 3
Disagreements = 4
Other (please specify) =
5………………………………………………………

27. How many fishing trips do your boats make each day? 

28. How many fishing trips do your boats make each week?

29. Why do your boats make this many trips each week?

Not worth it financially going out more often = 1
Not enough boat crew to employ = 2
Fish truck only comes a few times a week = 3
Have other businesses to attend to = 4
Other (please specify) = 5
……………………………………………………………………………………………..

30. Does your boat always stay at this landing site?

Yes = 1
No = 2

31. If no, how many beaches did your boats fish from in the last year? 

32. How do you pay your boat crew?

In cash only = 1
Give share of fish catch = 2
In cash and fish = 3

33. Do you pay them each day they work?

Yes = 1
No = 2

34. How much does fishing contribute to your household income?

All = 100%
If not all, please give a percentage
35. What is your average income from one fish trip? 

36. How has your income from fish catches changed over the last year? 

- Increased = 1
- Decreased = 2
- Stayed about the same = 3
- Do not know = 4

37. If your income from fish catches has changed, what is the main reason for the change? 

- More fish = 1
- Less fish = 2
- More valuable fish = 3
- Fish prices gone up = 4
- Fish prices gone down = 5
- I invested in the business = 6
- Other (please specify) = 7

38. What is your own income mainly spent on? Circle up to three items. 

- Food = 1
- School fees = 2
- House rent = 3
- Business = 4
- Medical costs = 5
- Leisure = 6
- Investment = 7
- Savings = 8
- Other (specify) = 9

39. If living with other people, what is the household income mainly spent on? Circle up to three items. 

- Food = 1
- School fees = 2
- House rent = 3
- Business = 4
- Medical costs = 5
- Leisure = 6
- Investment = 7
- Savings = 8
- Other (specify) = 9

40. What is the main way in which you would spend more money?
More food = 1
Other household consumption = 2
School fees = 3
Savings = 4
Invest in your business = 5
Other (specify) = 
6

Bank Account/Savings

41. Do you have a bank account?
   Yes = 1
   No = 2

42. For how many years have you had the bank account?

43. Where is the bank?
   Within this village = 1
   Another village nearby = 2
   Main location/ward/sub-county town = 3
   Main district town = 4
   Other district = 5
   Other country = 6

   Estimate of distance in kms

44. Do you belong to any other savings scheme?
   Yes = 1
   No = 2

45. If yes, what type of savings scheme is it?
   Run by local people for themselves = 1
   NGOs = 2
   Other financing institution = 3

46. If no, why don’t you belong to a savings scheme?
   No savings scheme near enough = 1
   No money available to save = 2
   Do not want to save money = 3
   Do not know how to save money = 4
   Other reason (please specify) = 5

47. For how many years have you belonged to the savings scheme?
48. Have you ever received credit from a financial institution?
   Yes = 1
   No = 2

49. If yes, what type of institution?
   Bank = 1
   SACCOS = 2
   Micro-finance institution = 3
   NGO = 4
   Friends or family = 5
   Fish factory agent = 6
   Fish factory = 7
   Other (please specify) = 8

50. Why did you get the credit?
   To start a new business = 1
   Build a house = 2
   Buy land = 3
   Invest in fishing = 4
   Other (please specify) = 5

51. Did you have any difficulties paying back the credit?
   Yes = 1
   No = 2

52. If yes, what?
   Could not pay it all back = 1
   Could not pay back in time = 2
   Business failed = 3
   Other (please specify) = 4

53. If credit was available, what would you use it for?
   Buy fishing gears and boat = 1
   Rent fishing gears and boat = 2
   Set up other fisheries business = 3
   Set up non-fisheries business at landing site = 4
   Set up non-fisheries business away from landing site = 5
   Buy land = 6
   Build a house = 7
   Other (please specify) = 8
Mobile phones
54. Do you own a mobile phone?
   Yes = 1
   No = 2

55. If yes, how many years have you had a mobile phone for?
56. What is the main reason why you bought a mobile phone?
   Circle one main reason.
   To find out about fish prices = 1
   To support my other businesses = 2
   Security = 3
   To keep in contact with home = 4
   Everyone has a phone = 5
   Other reason (please specify) = 6

57. Which network do you use?
    MTN = 1
    Celtel = 2
    Vodacom = 3
    Safaricom = 4
    Other (specify) = 5

58. How much do you spend each week on airtime?

BMU
59. Are you a registered member of this or another BMU?
   Yes = 1
   No = 2

60. Did you vote in the elections for the BMU Committee?
   Yes = 1
   No = 2

61. Have you attended a meeting of the BMU Assembly in the last six months?
   Yes = 1
   No = 2

62. If yes, how many?
63. If no, why not?

No meetings have taken place = 1
Was not around when the meetings were held = 2
Did not want to attend the meetings = 3
Other reason (please specify) = 4

64. Do you have a greater say in making decisions about the fisheries now that the BMU has been formed/reformed than before?

Yes = 1
No = 2

65. If yes, why?

I am on the BMU Committee = 1
I have attended Assembly meetings = 2
I have spoken at Assembly meetings = 3
The BMU Committee has asked me about my views = 4
The boat crew on the Committee represent us well = 5
Other reason (please specify) = 6

66. If no, why not?

No BMU Assembly meetings held = 1
I don’t know anything about the BMU = 2
The BMU Committee does not listen to people = 3
The BMU Chair does what he/she wants = 4
The new BMU is too young = 5
Other reason (please specify) = 6

Health

67. Have you ever received any information about HIV/AIDS?

Yes = 1
No = 2

68. If yes, how did you receive the information?

From a health centre/VCT = 1
From the radio = 2
From local drama = 3
From a leaflet = 4
Community trainer = 5
Other (specify) = 6

69. Do you believe you know enough about HIV/AIDS?
Yes = 1
No = 2

70. If not, how would you like to receive more information?
Circle all that apply.
From a clinic = 1
Leaflet = 2
Poster = 3
Radio programmes = 4
Baraza = 5
Community trainer = 6
Information in newspapers = 7
Other (please specify) = 8

71. What type of assistance is most needed to address HIV/AIDS at this landing site?
More education/information = 1
VCT = 2
ARVs = 3
Support to orphans/widows = 4
Other (please specify) = 5

72. Have you received health treatment in the last month?
Yes = 1
No = 2

73. If yes, where did you get the health treatment from?
Referral hospital = 1
District/provincial hospital = 2
Public dispensary = 3
Public health centre = 4
Private dispensary/hospital = 5
Private clinic = 6
Traditional healer = 7
Missionary hospital/dispensary = 8
Pharmacy/chemist = 9
Kiosk/drug store = 10
Other (specify) = 11

74. How far is the nearest health facility?

In this village = 1
In this district = 2
In neighbouring district = 3

Estimated kms

75. What is the nearest health facility?

Referral hospital = 1
District/provincial hospital = 2
Public dispensary = 3
Public health centre = 4
Private dispensary/hospital = 5
Private clinic = 6
Traditional healer = 7
Missionary hospital/dispensary = 8
Pharmacy/chemist = 9
Kiosk/drug store = 10
Other (specify) = 11
Appendix 3: Boat Crew Questionnaire

LAKE VICTORIA FISHERIES ORGANIZATION
IMPLEMENTATION OF A FISHERIES MANAGEMENT PLAN

SOCIO-ECONOMIC MONITORING QUESTIONNAIRE FEBRUARY 2007

BOAT CREW ONLY

Name of Beach .................................................. District............................................

Date ........................................................... Enumerator
Initials..........................

Respondent Number ......................

Introduction
The Lake Victoria Fisheries Organization is undertaking a survey around the lake to find out more about people’s lives and how they benefit from fishing activities. Could you please spare a few minutes of your time to answer some questions? All responses will be treated with complete confidence and will be used to help the Fisheries Departments plan better for improving people’s lives and improving the fisheries.

Main fishery of respondent
Nile perch (outboard) = 1
Nile perch (manual) = 2
Dagaa = 3
Tilapia = 4

Background information
76. Where were you born?

Within this village = 1
Another village nearby = 2
This location/sub-county/ward = 3
This district = 4
Other district bordering lake = 5
Other district not bordering lake = 6
Other country = 7

Name of district and country........................................................................................................

77. If not born in this village, why did you move here?

For work = 1
Family reasons = 2
Other (please specify) = 3
78. Do you live at this landing site permanently?

Yes = 1
No = 2

If no, go to question 5.

79. If yes, for how many years have you lived here?

Go to question 6.

80. If no, where do you normally stay?

Another landing site in same location/sub-county/ward = 1
Another landing site in same district = 2
Another landing site in other district = 3
Not at a fish landing site = 4
Other (please specify) = 5

81. What is your age?

82. What is your marital status?

Never married = 1
Monogamous married = 2
Polygamous married = 3
Living together without marriage = 4
Separated/divorced = 5
Widowed = 6

If not married, go to question 14.

83. If married, for how many years?

84. If married, have you married before?

Yes = 1
No = 2

10. If yes, how many times have you been married?

11. If married now, did you

Get married in a church/mosque = 1
Have a civil marriage = 2
Customary marriage = 3
12. Does your spouses/partners live in this household now?

Yes = 1
No = 2

13. If no, where does she/they live now?

Another house at the landing site = 1
In the nearby village = 2
In nearby town = 3
In home village = 4
Other (please specify) = 5

14. What level of education did you reach?

No education = 1
Incomplete primary = 2
Complete primary = 3
Incomplete secondary = 4
Completed Secondary = 5
Higher education = 6

Income and expenditure
15. What are the three main sources of income in your household?
   Rank up to three sources.

21. Do you work on other boats?

   Yes = 1
   No  = 2
22. If yes, how many boats in total have you worked on in the last year? 

23. How many beaches have you worked on in the last year? 

24. Which type of fish do you mainly target?
   - Nile perch = 1
   - Tilapia = 2
   - Dagaa = 3
   - Other = 4

25. How many days a week do you normally go fishing? 

26. If crew do not work every week, how many days a month do they go out fishing? 

27. Why do you work this number of days on average?
   - Work enough days = 1
   - Do not want to work more days = 2
   - Boat only goes out that many times a week = 3
   - No more work available with other boat owners = 4
   - Other (please specify) = 5

28. For how many months of the year is there plenty of work? 

29. How are you paid?
   - In cash only = 1
   - In share of fish catch, which I sell = 2
   - In share of fish catch, which is sold by boat owner = 3
   - In cash and fish = 4

30. Are you paid each day that you work?
   - Yes = 1
   - No = 2

31. How many days that you work in a week do you get cash? 

32. How much does fishing contribute to your household income?
   - All = 100%
   - If not all, please give a percentage

33. If you get paid each day you work, how much is it on average?
34. If you get paid on a weekly basis, how much is your weekly income?  

35. How has your income from fish catches changed over the last year?  

- Increased = 1  
- Decreased = 2  
- Stayed about the same = 3  
- Do not know = 4  

36. If your income from fish catches has changed, what is the main reason for the change?  

- More work = 1  
- Less work = 2  
- Less fish = 3  
- More fish = 4  
- More valuable fish = 5

- Fish prices gone down = 7  
- Other (please specify) = 8  

37. What is your own income mainly spent on? Circle up to three items.  

- Food = 1  
- School fees = 2  
- House rent = 3  
- Business = 4  
- Medical costs = 5  
- Leisure = 6  
- Investment = 7  
- Savings = 8  
- Other (specify) = 9  

38. If living with other people, what is the household income mainly spent on? Circle up to three items.  

- Food = 1  
- School fees = 2  
- House rent = 3  
- Business = 4  
- Medical costs = 5  
- Leisure = 6  
- Investment = 7  
- Savings = 8  
- Other (specify) = 9
39. What is the main way in which you would spend more money?

- More food = 1
- Other household consumption = 2
- School fees = 3
- Savings = 4
- Invest in your business = 5
- Other (specify) = 6

Bank Account/Savings

40. Do you have a bank account?

- Yes = 1
- No = 2

41. For how many years have you had the bank account?

42. Where is the bank?

- Within this village = 1
- Another village nearby = 2
- Main location/ward/sub-county town = 3
- Main district town = 4
- Other district = 5
- Other country = 6

Estimate of distance in kms

43. Do you belong to any other savings scheme?

- Yes = 1
- No = 2

If no, go to question 46.

44. If yes, what type of savings scheme is it?

- Run by local people for themselves = 1
- NGOs = 2
- Other financing institution = 3

45. For how many years have you belonged to the savings scheme?

46. If no, why don’t you belong to a savings scheme?

- No savings scheme near enough = 1
- No money available to save = 2
- Do not want to save money = 3
- Do not know how to save money = 4
47. Have you ever received credit from a financial institution?

Yes = 1
No = 2

48. If yes, what type of institution?

Bank = 1
SACCOS = 2
Micro-finance institution = 3
NGO = 4
Friends or family = 5
Fish factory agent = 6
Fish factory = 7
Other (please specify) = 8

49. Why did you get the credit?

To start a new business = 1
Build a house = 2
Buy land = 3
Invest in fishing = 4
Other (please specify) = 5

50. Did you have any difficulties paying back the credit?

Yes = 1
No = 2

51. If yes, what?

Could not pay it all back = 1
Could not pay back in time = 2
Business failed = 3
Other (please specify) = 4

52. If credit was available, what would you use it for?

Buy fishing gears and boat = 1
Rent fishing gears and boat = 2
Set up other fisheries business = 3
Set up non-fisheries business at landing site = 4
Set up non-fisheries business away from landing site = 5
Buy land = 6
Build a house = 7
Other (please specify) = 8

---

**Mobile phones**

53. Do you own a mobile phone?

Yes = 1
No = 2

54. If yes, how many years have you had a mobile phone for?

55. What is the main reason why you bought a mobile phone?

Circle one main reason.

To find out about fish prices = 1
To support my other businesses = 2
Security = 3
To keep in contact with home = 4
Everyone has a phone = 5
Other reason (please specify) = 6

---

56. Which network do you use?

MTN = 1
Celtel = 2
Vodacom = 3
Safaricom = 4
Other (specify) = 5

---

57. How much do you spend each week on airtime?

---

**BMU**

58. Are you a registered member of this or another BMU?

Yes = 1
No = 2

59. Did you vote in the elections for the BMU Committee?

Yes = 1
No = 2
60. Have you attended a meeting of the BMU Assembly in the last six months?
   Yes  = 1
   No   = 2

61. If yes, how many?  

62. If no, why not?
   No meetings have taken place  = 1
   Was not around when the meetings were held  = 2
   Did not want to attend the meetings  = 3
   Other reason (please specify)  = 4

63. Do you have a greater say in making decisions about the fisheries now that the BMU has been formed/reformed than before?
   Yes  = 1
   No   = 2

64. If yes, why?
   I am on the BMU Committee  = 1
   I have attended Assembly meetings  = 2
   I have spoken at Assembly meetings  = 3
   The BMU Committee has asked me about my views  = 4
   The boat crew on the Committee represent us well  = 5
   Other reason (please specify)  = 6

65. If no, why not?
   No BMU Assembly meetings held  = 1
   I don’t know anything about the BMU  = 2
   The BMU Committee does not listen to people  = 3
   The BMU Chair does what he/she wants  = 4
   The new BMU is too young  = 5
   Other reason (please specify)  = 6

66. Have you ever received any information about HIV/AIDS?
   Yes  = 1
   No   = 2
67. If yes, how did you receive the information?

<table>

Appendix 4: Women Questionnaire

LAKE VICTORIA FISHERIES ORGANIZATION
IMPLEMENTATION OF A FISHERIES MANAGEMENT PLAN

SOCIO-ECONOMIC MONITORING QUESTIONNAIRE FEBRUARY 2007

WOMEN ONLY

Name of Beach ........................................ District.................................

Date ........................................ Enumerator
Initials......................

Respondent Number .................

Introduction
The Lake Victoria Fisheries Organization is undertaking a survey around the lake to find out more about people’s lives and how they benefit from fishing activities. Could you please spare a few minutes of your time to answer some questions? All responses will be treated with complete confidence and will be used to help the Fisheries Departments plan better for improving people’s lives and improving the fisheries.

Main occupation of respondent
Fish processor  = 1
Fish trader  = 2
Fish processor and trader  = 3
Boat owner  = 4
Other (please specify)  = 5

Background information
85. Where were you born?

Within this village  = 1
Another village nearby  = 2
This location/sub-county/ward  = 3
This district  = 4
Other district bordering lake  = 5
Other district not bordering lake  = 6
Other country  = 7

Name of district and country
........................................................................................................

86. If not born in this village, why did you move here?

For work  = 1
Family reasons  = 2
87. Do you live at this landing site permanently?
   Yes = 1
   No = 2

88. If yes, for how many years have you lived here?

89. If no, where do you normally stay?
   Another landing site in same location/sub-county/ward = 1
   Another landing site in same district = 2
   Another landing site in other district = 3
   Not at a fish landing site = 4
   Other = 5

90. What is your age?

91. What is your marital status?
   Never married = 1
   Monogamous married = 2
   Polygamous married = 3
   Living together without marriage = 4
   Separated/divorced = 5
   Widowed = 6

92. If married, for how many years?

93. If married, have you been married before?
   Yes = 1
   No = 2

94. If yes, how many times have you been married?

95. If married now, did you
   Get married in a church/mosque = 1
   Have a civil marriage = 2
   Customary marriage = 3
   Did nothing = 4
   Other (please specify) = 5
96. Does your spouse/partner live in this household now?

Yes = 1
No = 2

97. If no, where does he live now?

Another house at the landing site = 1
In the nearby village = 2
In nearby town = 3
In home village = 4
Other (please specify) = 5

98. What level of education did you reach?

No education = 1
Incomplete primary = 2
Complete primary = 3
Incomplete secondary = 4
Completed Secondary = 5
Higher education = 6

Income and expenditure

99. What are the three main sources of income in your household?
Rank up to three sources.

<table>

</tbody>
</table>
Fishing employment (wages and salaries)  2  
Fish trading & processing  3  
Net making or repairing  4  
Boat building and repairing  5  
Non-fishing employment: private sector  6  
Non-fishing employment: government  7  
Trading in other food commodities  8  
Trading in non-food items  9  
Farming (Crops and Horticulture)  10  
Livestock Farming  11  
Remittances or Transfer payments  12  
Rental income  13  
Other (specify)  14  

Other........................................................................................................................................

101. How many sources of income does your household have in total? 

102. For how many years have you had your main source of income?  

103. Does all your own income come from this beach or do you move between 
beaches to improve your income? 

    Income from this beach  = 1  
    Move between beaches   = 2  

104. How many days a week do you normally spend on fisheries-related activities?  

105. How much does fishing contribute to your household income?  

    All  = 100%  
    If not all, please give a percentage  

106. What is your average daily income from fisheries?  

........................................................................................................................................

107. How has your income from fisheries changed over the last year?  

    Increased  = 1  
    Decreased  = 2  
    Stayed about the same  = 3  
    Do not know  = 4  

108. If your income from fish catches has changed, what is the main reason for the 
change?  

    More fish  = 1
Less fish = 2
Fish is more expensive = 3
Too much competition for buying fish = 4
I invested in the business = 5
Other (please specify) = 6

109. How has your household income from fisheries changed over the last year?

Increased = 1
Decreased = 2
Stayed about the same = 3
Do not know = 4

110. If your household income from fish catches has changed, what is the main reason for the change?

More fish = 1
Less fish = 2
Fish is more expensive = 3
Too much competition for buying fish = 4
Other (please specify) = 5

111. Who makes the decision in your household on how household income is spent?

Husband = 1
Other male member of household (state relationship) = 2
Me and husband = 3
Me only = 4
All adult members = 5
Other (please state) = 6

112. Who makes the decision in your household on how your own income is spent?

Husband = 1
Other male member of household (state relationship) = 2
Me and husband = 3
Me only = 4
All adult members = 5
Other (please state) = 6

113. What is your own income mainly spent on? Circle up to three items.

Food = 1
School fees = 2
House rent = 3
Business = 4
Medical costs = 5
Leisure = 6
Investment = 7
Savings = 8
Other (specify) =

114. What is **household** income mainly spent on? Circle up to three items.

Food = 1
School fees = 2
House rent = 3
Business = 4
Medical costs = 5
Leisure = 6
Investment = 7
Savings = 8
Other (specify) =

115. What is the main way in which you would spend more money?

More food = 1
Other household consumption = 2
School fees = 3
Savings = 4
Invest in your business = 5
Other (specify) =

**Bank Account/Savings**

116. Do you or someone else in your household have a bank account?

Yes = 1
No = 2

117. Who does the bank account belong to?

Me only = 1
Husband = 2
Other male member of household = 3
Me and husband = 4
Other (please state) =

118. For how many years has that person had the bank account? 

119. Where is the bank?

Within this village = 1
Another village nearby = 2
Main location/ward/sub-county town = 3
Main district town = 4
Other district = 5
Other country = 6

Estimate of distance in kms

120. Do you belong to any other savings scheme?
   Yes = 1
   No = 2

121. If yes, what type of savings scheme is it?
   Run by local people for themselves = 1
   NGOs = 2
   Other financing institution = 3

122. If no, why don’t you belong to a savings scheme?
   No savings scheme near enough = 1
   No money available to save = 2
   Do not want to save money = 3
   Do not know how to save money = 4
   Other reason (please specify) = 5

123. For how many years have you belonged to the savings scheme? 

124. Have you ever received credit from a financial institution?
   Yes = 1
   No = 2

125. If yes, what type of institution?
   Bank = 1
   SACCOS = 2
   Micro-finance institution = 3
   NGO = 4
   Friends or family = 5
   Fish factory agent = 6
   Fish factory = 7
   Other (please specify) = 8

126. Why did you get the credit?
   To start a new business = 1
127. Did you have any difficulties paying back the credit?
   Yes = 1
   No = 2

128. If yes, what?
   Could not pay it all back = 1
   Could not pay back in time = 2
   Business failed = 3
   Other (please specify) =
   4..........................................................................

129. If credit was available, what would you use it for?
   Expand your business = 1
   Buy fishing gears and boat = 2
   Rent fishing gears and boat = 3
   Set up other fisheries business = 4
   Set up non-fisheries business at landing site = 5
   Set up non-fisheries business away from landing site = 6
   Buy land = 7
   Build a house = 8
   Other (please specify) = 9
   ..........................................................................

Mobile phones
130. Do you own a mobile phone?
   Yes = 1
   No = 2

131. If yes, how many years have you had a mobile phone for? 

132. What is the main reason why you bought a mobile phone?
   Circle one main reason.
   To find out about fish prices = 1
   To support my other businesses = 2
   Security = 3
   To keep in contact with home = 4
   Everyone has a phone = 5
133. Which network do you use?

- MTN = 1
- Celtel = 2
- Vodacom = 3
- Safaricom = 4
- Other (specify) = 5

134. How much money do you spend each week on airtime?

135. Are you a registered member of this or another BMU?

- Yes = 1
- No = 2

136. Did you vote in the elections for the BMU Committee?

- Yes = 1
- No = 2

137. Have you attended a meeting of the BMU Assembly in the last six months?

- Yes = 1
- No = 2

138. If yes, how many?

139. If no, why not?

- No meetings have taken place = 1
- Was not around when the meetings were held = 2
- Did not want to attend the meetings = 3
- Other reason (please specify) = 4

140. Do you have a greater say in making decisions about the fisheries now that the BMU has been formed/reformed than before?

- Yes = 1
- No = 2

141. If yes, why?

- I am on the BMU Committee = 1
I have attended Assembly meetings = 2
I have spoken at Assembly meetings = 3
The BMU Committee has asked me about my views = 4
The boat crew on the Committee represent us well = 5
Other reason (please specify) = 6

142. If no, why not?

No BMU Assembly meetings held = 1
I don't know anything about the BMU = 2
The BMU Committee does not listen to people = 3
The BMU Chair does what he/she wants = 4
The new BMU is too young = 5
Other reason (please specify) = 6

Health

143. Have you ever received any information about HIV/AIDS?

Yes = 1
No = 2

144. If yes, how did you receive the information?

From a health centre/VCT = 1
From the radio = 2
From local drama = 3
From a leaflet = 4
Community trainer = 5
Other (specify) = 6

145. Do you believe you know enough about HIV/AIDS?

Yes = 1
No = 2

146. If not, how would you like to receive more information?

Circle all that apply.

From a clinic = 1
Leaflet = 2
Poster = 3
Radio programmes = 4
Baraza = 5
Community trainer = 6
Information in newspapers = 7
Other (please specify) = 8
147. What type of assistance is most needed to address HIV/AIDS at this landing site?

More education/information = 1
VCT = 2
ARVs = 3
Support to orphans/widows = 4
Other (please specify) = 5.

148. Have you received health treatment in the last month?

Yes = 1
No = 2.

149. If yes, where did you get the treatment from?

Referral hospital = 1
District/provincial hospital = 2
Public dispensary = 3
Public health centre = 4
Private dispensary/hospital = 5
Private clinic = 6
Traditional healer = 7
Missionary hospital/dispensary = 8
Pharmacy/chemist = 9
Kiosk/drug store = 10
Other (specify) = 11.

150. How far is the nearest place for health treatment?

In this village = 1
In this district = 2
In neighbouring district = 3

Estimated kms

151. What is the nearest health facility?

Referral hospital = 1
District/provincial hospital = 2
